Skills

- | | | | | | |
|------------------|----------------------|--------------------|----------------------|------------------------|------------|
| • Flutter | • MVC | • Solid Principles | • Debugging | • Stripe Payment | • Dio |
| • Dart | • MVI | • Bloc/Cubit | • Firebase Auth | • Google Maps | • Retrofit |
| • OOP | • Clean Architecture | • GetX | • Cloud Firestore | • Responsive UI | • Http |
| • RESTful APIs | • Clean Code | • Provider | • Firebase Messaging | • Adaptive UI | • Agile |
| • Design Pattern | • Git | • Riverpod | • Supabase | • Communication | • Scrum |
| • MVVM | • GitHub | • Testing | • Hive | • Dependency Injection | • Jira |

Work Experience

Flutter Developer (Freelance)

Self-Employed — Cairo, Egypt

Jan 17, 2025 – Mar 13, 2025

Flutter Developer (Part-Time)

Mr Perfection Business — Cairo, Egypt

Apr 27, 2025 – Aug 10, 2025

Projects

- **Evently App** | Flutter, Firebase Auth, Cloud Firestore, Bloc/Cubit, Google Maps, MVVM Pattern [GitHub](#)
 - Evently is a feature-rich event management and discovery application built with Flutter. It allows users to explore events, participate, create, manage favorites, and navigate through an interactive map. With robust authentication, real-time updates, and support for themes and languages, Evently delivers a seamless and personalized user experience.
- **News App** | Flutter, Riverpod, RESTful APIs, MVVM Pattern, Repository Pattern, Dependency Injection [GitHub](#)
 - News App – A cross-platform Flutter application delivering real-time global news with category-based navigation, source filtering, and search with pagination. Features include a responsive UI with light/dark theme support
- **T Store E-commerce App** | Flutter, Firebase Auth, Cloud Firestore, Firebase Storage, GetX, Stripe Payment, MVVM Pattern [GitHub](#)
 - Built a full-featured e-commerce app with a secure authentication system, product search, wishlist, reviews, checkout with Stripe payments, and multi-language support (English & Arabic). Designed a user-friendly interface with light/dark themes for accessibility.
- **Spotify Clone App** | Flutter, Firebase Auth, Cloud Firestore, Firebase Messaging, Supabase Storage, Hive, GetX, MVVM pattern [GitHub](#)
 - Developed a feature-rich music streaming app with a secure authentication system, an intuitive onboarding process, and light/dark theme support. Implemented playlist creation and management, offline playback, search functionality, user following, public profiles, and a favorites system. Integrated push notifications for new album releases.
- **Online Exam App** | Flutter, Bloc/Cubit, RESTful APIs, MVI Pattern, Retrofit, Clean Architecture, Dependency Injection [GitHub](#)
 - The Online Exam allows users to register, log in, and take timed exams across different categories. The app ensures a smooth and organized exam experience, complete with scoring, profile management, and secure authentication.
- **Safqa App** | Flutter, Firebase Auth, Firebase Messaging, RESTful APIs, Google Maps, MVC Pattern [GooglePlay](#)
 - Developed a multi-vendor e-commerce app that allows business owners to register and list products, enabling users to browse and purchase items across various markets. Implemented secure authentication (email and Gmail) and designed a dynamic user interface featuring product categories, market listings, best-performing markets, and top-selling products. Included views for order tracking, favorites management (products and markets), promotional videos, and profile settings with language switching (Arabic/English), account management, and a contact form. Integrated market-specific shopping carts with address input using Google Maps for accurate delivery.
